Author of

The Foodscape Revolution

Gardening with Grains

Originally from Monroe, MI Based in Raleigh, NC Zone 7

15 years as a Propagator & Grower Plant Delights & Camellia Forest

This why HOA's don't like veggie gardens

Building a Brand New Native Foodscape

Let's start a conversation

EVERYONE EATS!

This is NOT the best we can do

FOODSCAPING:

Integration of edibles in traditional landscapes & containers

Illustration by Preston Montague

Containers are a great place to start Foodscaping Learn more Saturday 2pm

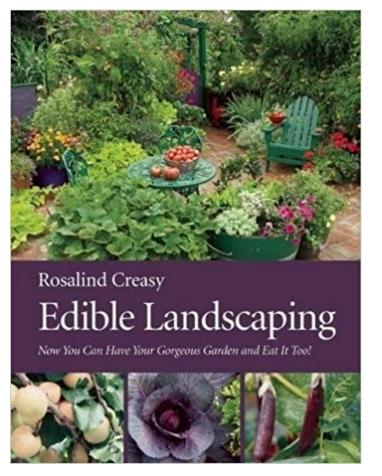

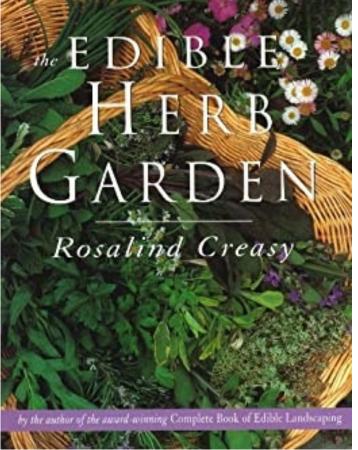

Ros Creasy

Ros Creasy's Edible Landscape

Create a plan, drawn to scale

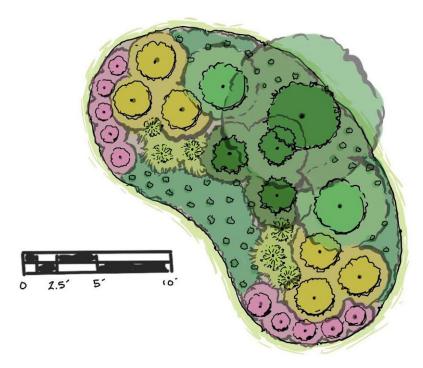

Illustration by Preston Montague

"Dessert Island"

Strawberry groundcover

Berry hedges

Fruit & Nut trees

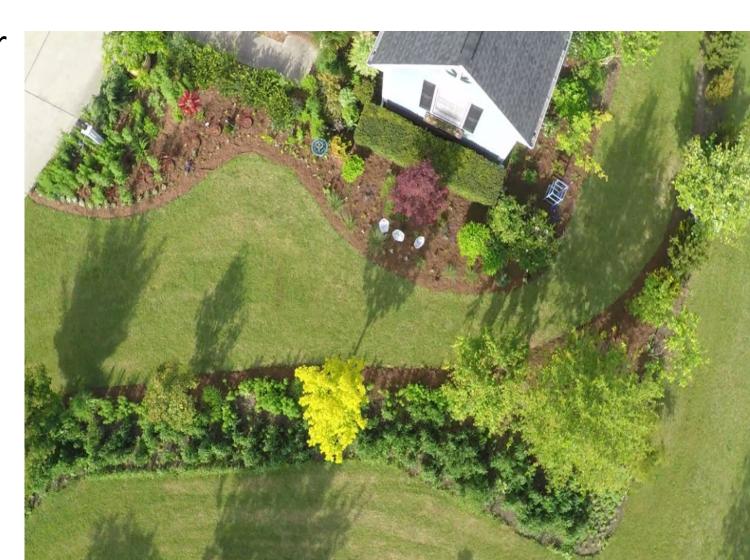

- Grow practical crops seasonably
- Select ornamental trees, shrubs and perennials for structure
- Reduce (but not eliminate turf)
- Rotate crops seasonally
- Utilize cover crops/ green mulch applications to improve soil
- Focus on diversity not monoculture planting

Foodscape Growing Zones

ZONE 1: Closest to house/ water 50% ornamental 50% edible

ZONE 2: Middle of the yard 60% ornamental 40% edible

ZONE 3: Property Edges **80% ornamental 20% edible**

Veggies like more SUN than shade

Sunlight:

FULL SUN= 8+ hours

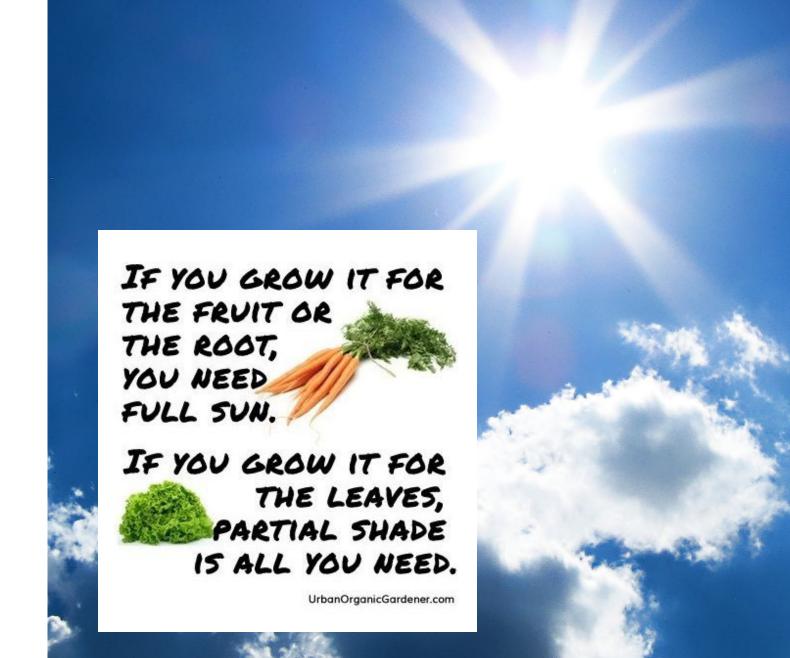

PART SUN = 4-6 hours

SHADE= 4 hours or less

Water:

DAILY = site close to hose!

WEEKLY = once established

Plant where it is convenient to water and harvest

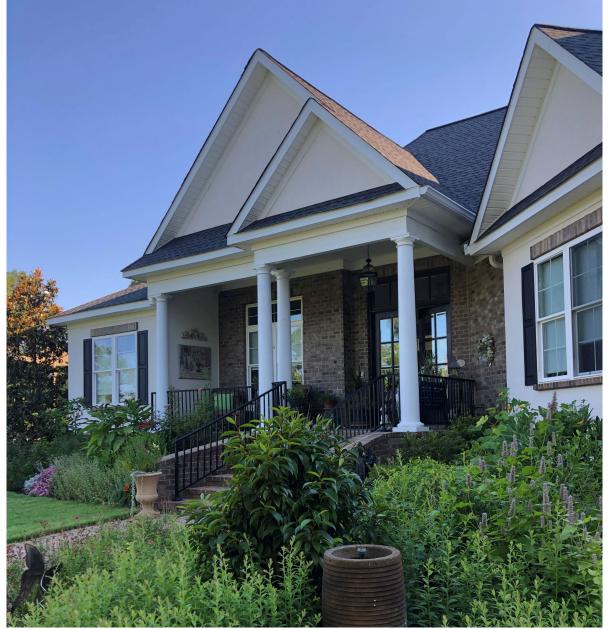

Utilize existing open mulch space

Success starts with LIVING SOIL rich in organic matter

What is the "best" mulch? LEAVES

Triple Shred Hardwood

Pine Nuggets

Pine Straw

Cedar

Cypress

COLORED MULCH IS MADE FROM GROUND PALLETS... BEWARE!

Not rated for food crops

I use a light layer of triple shred hardwood in December & June

- Available locally
- Helps suppress weeds
- Holds in moisture
- Looks neat and tidy
- Breaks down adding organic matter

Every fertilizer is DIFFERENT Pay attention to the N- P- K ratios UNDER 10

Essential macro-nutrients

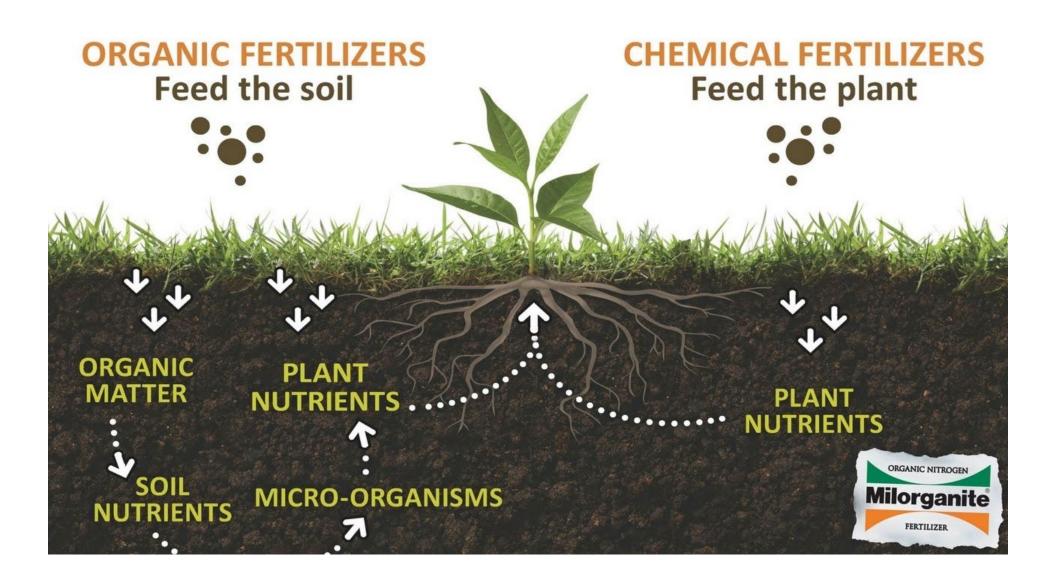

N= Nitrogen promotes leaf development

P= Phosphorus promotes root, blooms, and fruit set

K= Potassium promotes root and stem development

Synthetic chemistries reduce microbial activity

Put down the "blue stuff" and garden for the long-term health of your soil and plants

Too much fertilizer leads to insects

Insecticidal Soap

- Nontoxic
- Versatile
- Inexpensive
- Easy to make

- 1 tablespoon castile soap
- 1 quart of water per

Bt Bacillus thuringiensis

- Caterpillar control
- Apply selectively
- Brassica Crops

Garden Disease Control

My approach is simple:

PULL THE PLANT OUT and focus on disease resistant varieties

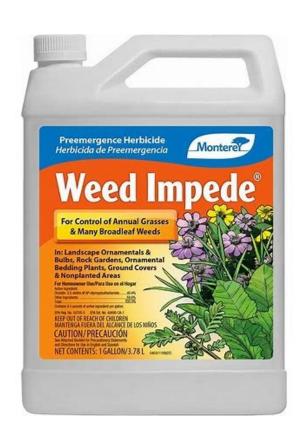

DO NOT USE Pre-Emergent Herbicides

Prevents ALL seed from germinating

Repellents

Reflective tape

Vole King Bags

Motion censored irrigation

Foodscaping SolutionS: Plant a Bed Edge

Arugula Basil Garlic Herbs Mustard **Onions Potatoes**

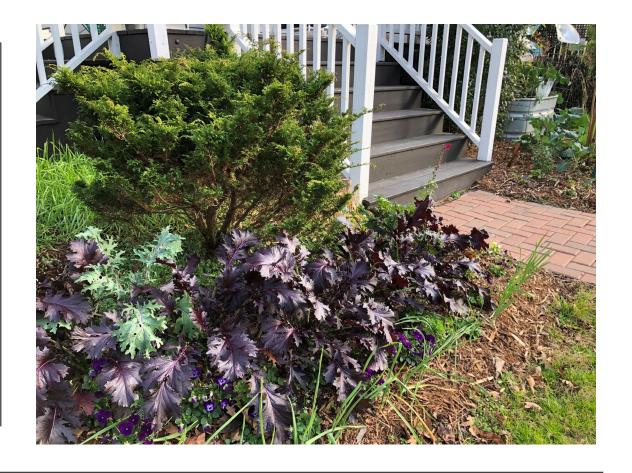

Spicy Greens Groundcovers

Arugula, Chard, Lettuce, Kale, Mustard, Spinach seed together

Broadcast seed over 1" of Soil3 organic compost
Plant Sept-November
Harvest all fall-spring

Miz America Mustard along edges deters animals

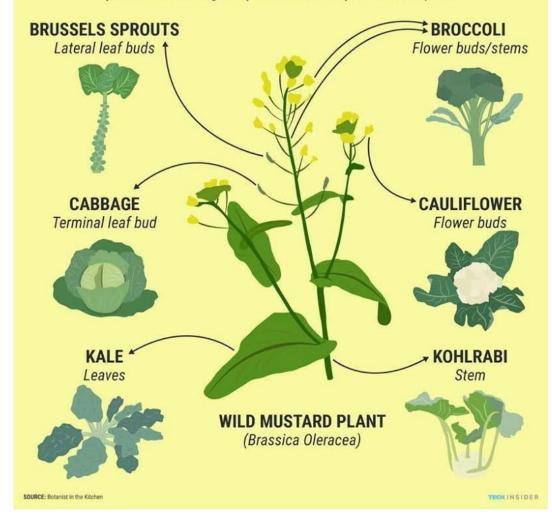

Foodscaping Plant Palette

Food Crops LACK Diversity

6 vegetables that are the same plant

Over hundreds of years farmers have been breeding one plant — called Brassica Oleracea — into dozens of different varieties. These six vegetables you can find in the grocery store are actually all the same plant.

Agastache foeniculum 'Blue Fortune'; 'Golden Jubilee'

Combined with leafy greens: 'Wildfire' Lettuce'

Amsonia hubrictii "Blue Star" Swiss Chard, Kale, Spinach

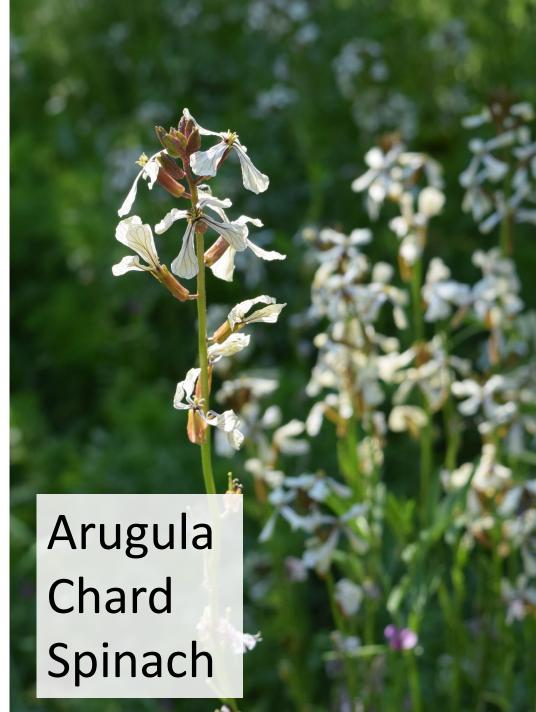

Baptisia

Fiber Optics Buttonbush

Cephalanthus occidentalis 'Bailoptics'

- Native deciduous shrub
- Zone 4 hardy
- Wet to dry soil
- Part-full sun
- 6' wide x 6' tall
- Fragrant flowers through summer
- Yellow fall color

IDEAL FOODSCAPE PAIRINGS

- Basil
- Broccoli
- Cabbage
- Cauliflower
- Eggplant
- Peppers

Brunswick- 90 days

Charleston Wakefield- 70 days

Earliana- 60 days

Golden Acre- 60 days

Late Flat Dutch- 100 days

Mammoth Red Rock- 90 days

Red Acre- 80 days

Savoy Perfection- 90 days

Echinacea
purpurea
combined with
herbs:

Thyme Rosemary Basil

Sombrero Coneflower Series

Zone 4 Full sun Average Soil

Spicy Globe Basil

- Plant in June along bed edges
- Space 8-12" apart
- Water as needed
- Best in full- part sun
- Strong scent deters deer, rabbits & groundhogs

Favorite Downy Mildew Resistant Basil:

'Amazel'

Fireside Ninebark

Physocarpus opulifolius 'Umnharpell'

- Flowering deciduous shrub
- Zone 3 hardy
- Average soil
- Full sun
- 6' wide x 7' tall
- Pink flowers in summer
- Dark red foliage

IDEAL FOODSCAPE PAIRINGS

- Basil
- Eggplant
- Kale
- Potatoes
- Tomatoes

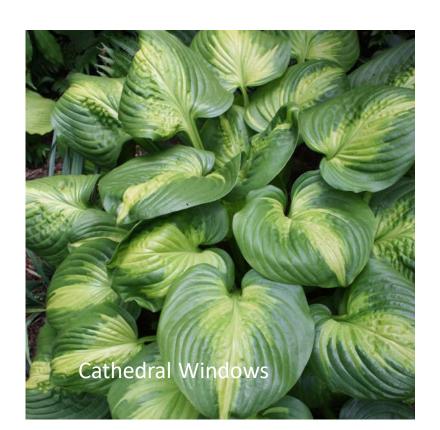

Hosta Zone 3 part sun Average Soil

IDEAL FOODSCAPE PAIRINGS

- Basil
- Garlic
- Onion
- Potatoes

Early, Mid & Late season potato varieties

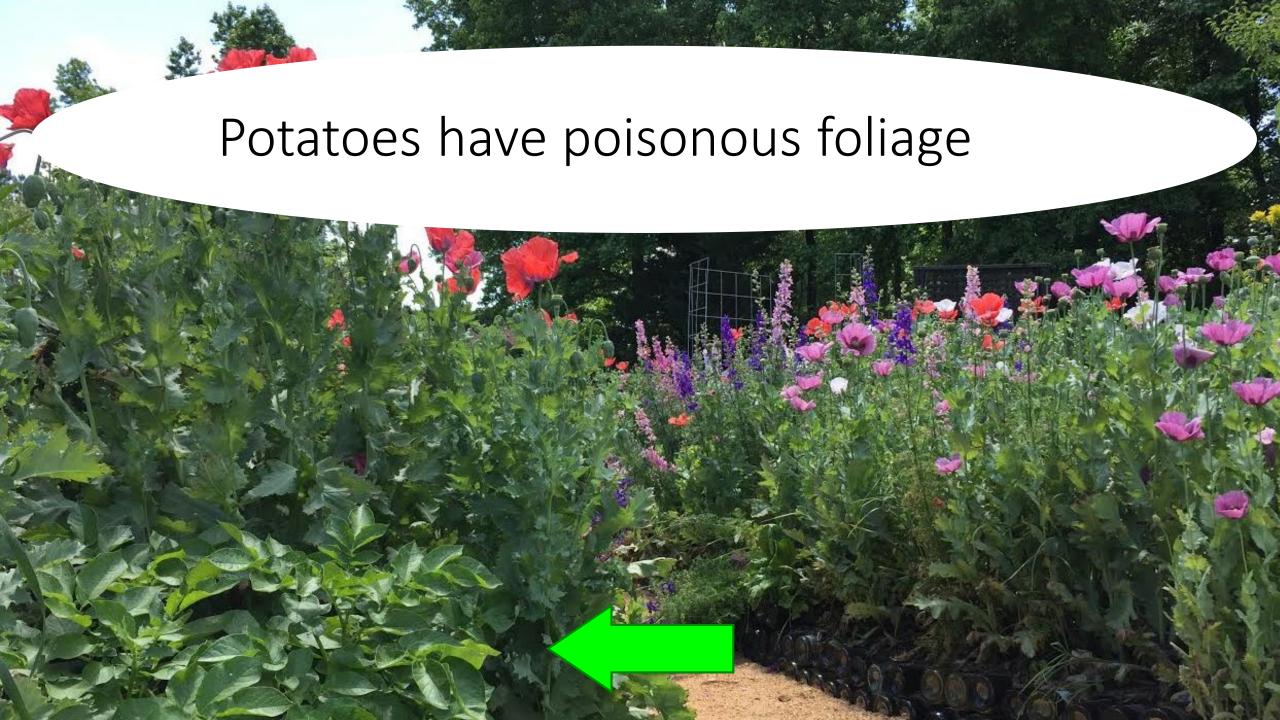

- All Blue
- Bintje (an heirloom)
- Butte
- Canela Russet
- Carola
- Desiree
- Fingerling varieties
- German Butterball
- Kennebec
- King Harry
- Purple Peruvian

The French Fry Story

Harvest
"new"

potatoes
when they
flower

Plant NOW in March Harvest in mid June

Cooked and served those potatoes Now he knows exactly where french fries come from!

Add Garlic to landscape borders

Hardneck Garlic

- Short Shelf Life (3-6 months)
- Strong flavor
- Impossible to braid
- Thrives in cold climates
- Produces a flower scape
- Common varieties:
 - Music
 - German Red/ White
 - Spanish Roja
 - Red Russian
 - Chesnok Red

Favorite Variety: 'Music'

Plant in fall/ early spring along bed edges to deter VOLES

Remove flower scape in spring

Harvest the bulbs when foliage dies in late Spring

Mid June Harvest & Cure 2-3 weeks

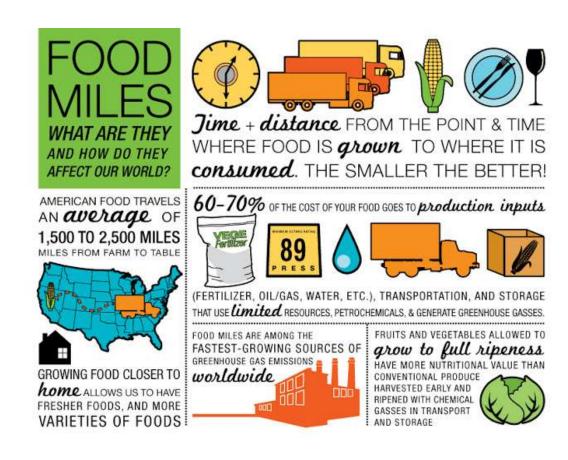

As of 2012, China is the largest producer of garlic

59 million metric tons annually

66% world production

90% garlic sold in US

US AVERAGE 2,200 MILES PER PRODUCT
